

At the Massachusetts General Hospital Corrigan Minehan Heart Center, a team of world-class physicians and nurses, each specializing in specific forms of heart disease, work closely together to offer leading treatments and preventive care for both common and complex cardiac conditions

## CROSS SPECIALTY CARDIAC CARE

The Massachusetts General Hospital Corrigan Minehan Heart Center has assembled a dedicated team of cardiologist, cardiac surgeons, cardiac anesthesiologists, cardiac nurses and cardiac radiologists to provide leading cardiac care. Our clinicians are some of the world's foremost experts in diagnosing, treating and preventing heart disease. Each of our 11 condition specific programs offer a team approach to diagnosis and treatment that involves a multidisciplinary team of physicians who specialize in a particular type of heart condition.

## TREATMENTS AND SERVICES

**Adult Congenital Heart Disease Program:** The Adult Congenital Heart Disease Program at the Massachusetts General Hospital Corrigan Minehan Heart Center offers personalized, lifelong care for adult patients with congenital heart disease, specializing in valve problems, heart failure, multidisciplinary surgery, arrhythmia and pregnancy.

**Atrial Fibrillation Program:** The Corrigan Minehan Heart Center's Atrial Fibrillation Program provides advanced care for atrial fibrillation (afib or AF) using catheter ablation with a variety of energy sources, including radiofrequency ablation, cryoablation and laser.

**Cardiac Arrhythmia Service:** The Cardiac Arrhythmia Service at the Massachusetts General Hospital Corrigan Minehan Heart Center offers the very latest diagnostic and treatment options to manage heart rhythm conditions.

**Cardio-Oncology Program:** The Massachusetts General Hospital Cardio-Oncology Program provides care at the intersection of heart and vascular disease, and cancer. The program focuses on improving the health of cancer patients and cancer survivors by providing comprehensive cardiac and vascular care.

**Cardiovascular Disease Prevention Center:** The Cardiovascular Disease Prevention Center at the Massachusetts General Hospital Corrigan Minehan Heart Center takes a prevention-as-treatment approach to caring for the heart and overall cardiovascular system.

**Cardiovascular Genetics Program:** The Cardiovascular Genetics Program at Massachusetts General Hospital specializes in clinical evaluations, genetic screening and personalized treatment for individuals with inherited cardiovascular diseases.

**Cardiovascular Performance Program:** The Cardiovascular Performance Program at the Massachusetts General Hospital Corrigan Minehan Heart Center offers specialized cardiac care for athletes, including leading treatments for suspected or confirmed heart disease, detailed pre-participation safety screenings and exercise assessments.

**Corrigan Women's Heart Health Program:** The Elizabeth Anne and Karen Barlow Corrigan Women's Heart Health Program at the Massachusetts General Hospital Corrigan Minehan Heart Center cares for women of all ages through prevention and early detection of heart disease.

**Heart Failure and Cardiac Transplant Program:** The Heart Failure and Cardiac Transplant Program at the Massachusetts General Hospital Corrigan Minehan Heart Center evaluates and manages a range of heart disease conditions that result in heart failure.

**Heart Valve Program:** The Heart Valve Program at the Massachusetts General Hospital Corrigan Minehan Heart Center brings together specialists to evaluate, treat and provide long-term care for patients with heart valve conditions.

**High-Risk Coronary Intervention Program:** The High-Risk Coronary Intervention Program at the Massachusetts General Hospital Corrigan Minehan Heart Center treats coronary artery disease, the blockage of the heart's arteries due to cholesterol build-up.

**Hypertension Treatment:** Treatment for hypertension at Massachusetts General Hospital involves several approaches to blood pressure control, including drug therapy and lifestyle modifications.

**Hypertrophic Cardiomyopathy Program:** The Hypertrophic Cardiomyopathy Program at the Massachusetts General Hospital Corrigan Minehan Heart Center in Boston provides expert care for hypertrophic cardiomyopathy, a condition characterized by an abnormal thickening of the left ventricle's muscle.

**Lipid Management:** Lipid Management services at the Massachusetts General Hospital Corrigan Minehan Heart Center care for patients who have disorders of lipid metabolism, which include high cholesterol, high blood triglyceride, low HDL cholesterol or a combination of these conditions.

**Resynchronization & Advanced Cardiac Therapeutics:** The Resynchronization and Advanced Cardiac Therapeutics Program at the Massachusetts General Hospital Corrigan Minehan Heart Center offers cardiac resynchronization therapy, or the use of a specialized pacemaker to treat patients with heart failure.

**Thoracic Aortic Center:** The Thoracic Aortic Center at Massachusetts General Hospital provides the most advanced care for conditions that involve the thoracic aorta (the portion of the aorta that is in the chest).
